

**Homework**  
**October Half Term**  
*Please return on Tuesday 31<sup>st</sup> October*

IPC	Numeracy and Literacy	Topic talk
<p>1) Design and make a new version of a game you like playing, but give it a Rainforest theme. It could be for two people, such as Snap or Top Trumps, or it could be a board game for several people, such as Monopoly or Snakes and Ladders. Make the game and write the rules out for how to play it. Bring it in after the holiday so we can all play it and try it out.</p> <p>2) Next half term, we plan on making some 'Rainforest drinks' for our end of term exhibition. Think of some ideas for recipes which we could make. What ingredients will we need? What flavours of juice would you like? Do we need anything to make it look special? Jot down your ideas and we'll have a go at some of them in class.</p>	<p>1) Times Tables- Please continue to practise times tables ready for the next round of tables tests after the holiday.</p> <p>2) Reading- Please continue to read during the holiday. It might be your reading book from school, or a favourite from home. It doesn't matter, as long as you are reading! Please record this in your diary so we can see what you have chosen to read.</p> <p>3) Continue to access Mathematics throughout the holiday and complete the homework set. Can you work towards achieving a certificate?</p>	<p>Talk through your ideas for your rainforest game with other people before you make it. Do they have any suggestions as to how you could make it better?</p> <p>Speak to other people about what their favourite combinations of flavoured juice are and research what would be the most and least popular.</p>
